

STAR Survey for Issue 2.7 AAC Voice Control for Environment, Information Access, and Distance Communication

Watch the STAR video at www.ctecaac.org/star and then answer these questions:

Voice control has made many of the tasks we do throughout the day effortless and convenient. Individuals with physical and developmental disabilities can use this same technology to independently access entertainment, like video and music. Any AAC device can open up a world of access if only the right vocabulary is used.

Please answer the following questions.

* 1. Which types of AAC devices can work with voice control technology?

- Just about any AAC voice device with voice output
- Only Android based AAC devices
- Only devices that have touch screen access
- Make each room have exactly the same words available

2. Do I need age appropriate literacy skills to participate in texting and social media?

- yes
- no

* 3. What are some of the things I can do with voice control? (Mark all that apply. This question is not scored.. just tell us what you are interested in)

- Use the phone to call my friend
- Control things in my environment, like turning on a fan or a heater
- Listen to songs by my favorite artists
- search the web
- get the news or weather

Other (please specify)

* 4. I feel this video was... (Check all that apply)

Helpful! I learned something new!

Bad. This information was NOT helpful.

Awesome! I will use this information right away.

Disappointing. I do not agree with the information in this video.

Insightful. This information was applicable to someone I know

Interesting. The video contained information that was interesting but not applicable to anyone I know.

5. Here is a place to provide feedback on this S.T.A.R. video.
