

Support My Communication!

With your willingness and consideration, you can support everyone in communicating without barriers by following these 7 reminders:

Keep My Device Charged

Help me to keep my device charged and accessible at all times.

Acknowledge Me

Acknowledging ALL my communication attempts (verbal, signing, device, gestures, etc).

Model For Me

Model for me by using my device, or printed pages from my vocabulary, as much as possible in many different settings.

Narrate More, Ask Less

Instead of asking too many questions, try narrating more to obtain the information that you're seeking.

Make It Fun

Help me use my device during fun activities, not as a task.

Embrace the Silence

Allow me to be silent. This allows me time to process and think about what I want to say next.

Acceptance Is Key

Please accept all my different ways of communicating and don't force me to repeat on my device what I just communicated in a different way. You can use my device instead to expand on what I said and model to me that way.
